## SPC Floors

SPC (Stone Plastic Composite) flooring consists of limestone and vinyl, offering a combination of durability, design, and ease of maintenance.

SPC floors achieve realistic surfaces identical to wood, marble, and even carpet designs, thanks to the coordinated patterns and textures of the grains. These floors allow you to recreate warm and natural environments. With a variety of sizes, they can be installed in different settings and for various purposes. Lastly, their easy installation allows for decorating a space quickly and with minimal debris generation.

# Product Advantages

Designed to reduce the risk of slips or falls, providing a surface with greater slip resistance.

Designed so that care and maintenance are simple, efficient, and waterproof even when exposed to wet conditions, requiring minimal effort.

Manufactured with materials designed to reduce fire spread and delay its development. This feature is highly relevant in environments where fire safety is crucial, such as commercial and residential buildings.

Their composition with high-tech materials allows them to be resistant to wear from continuous use, maintaining structural integrity and appearance.

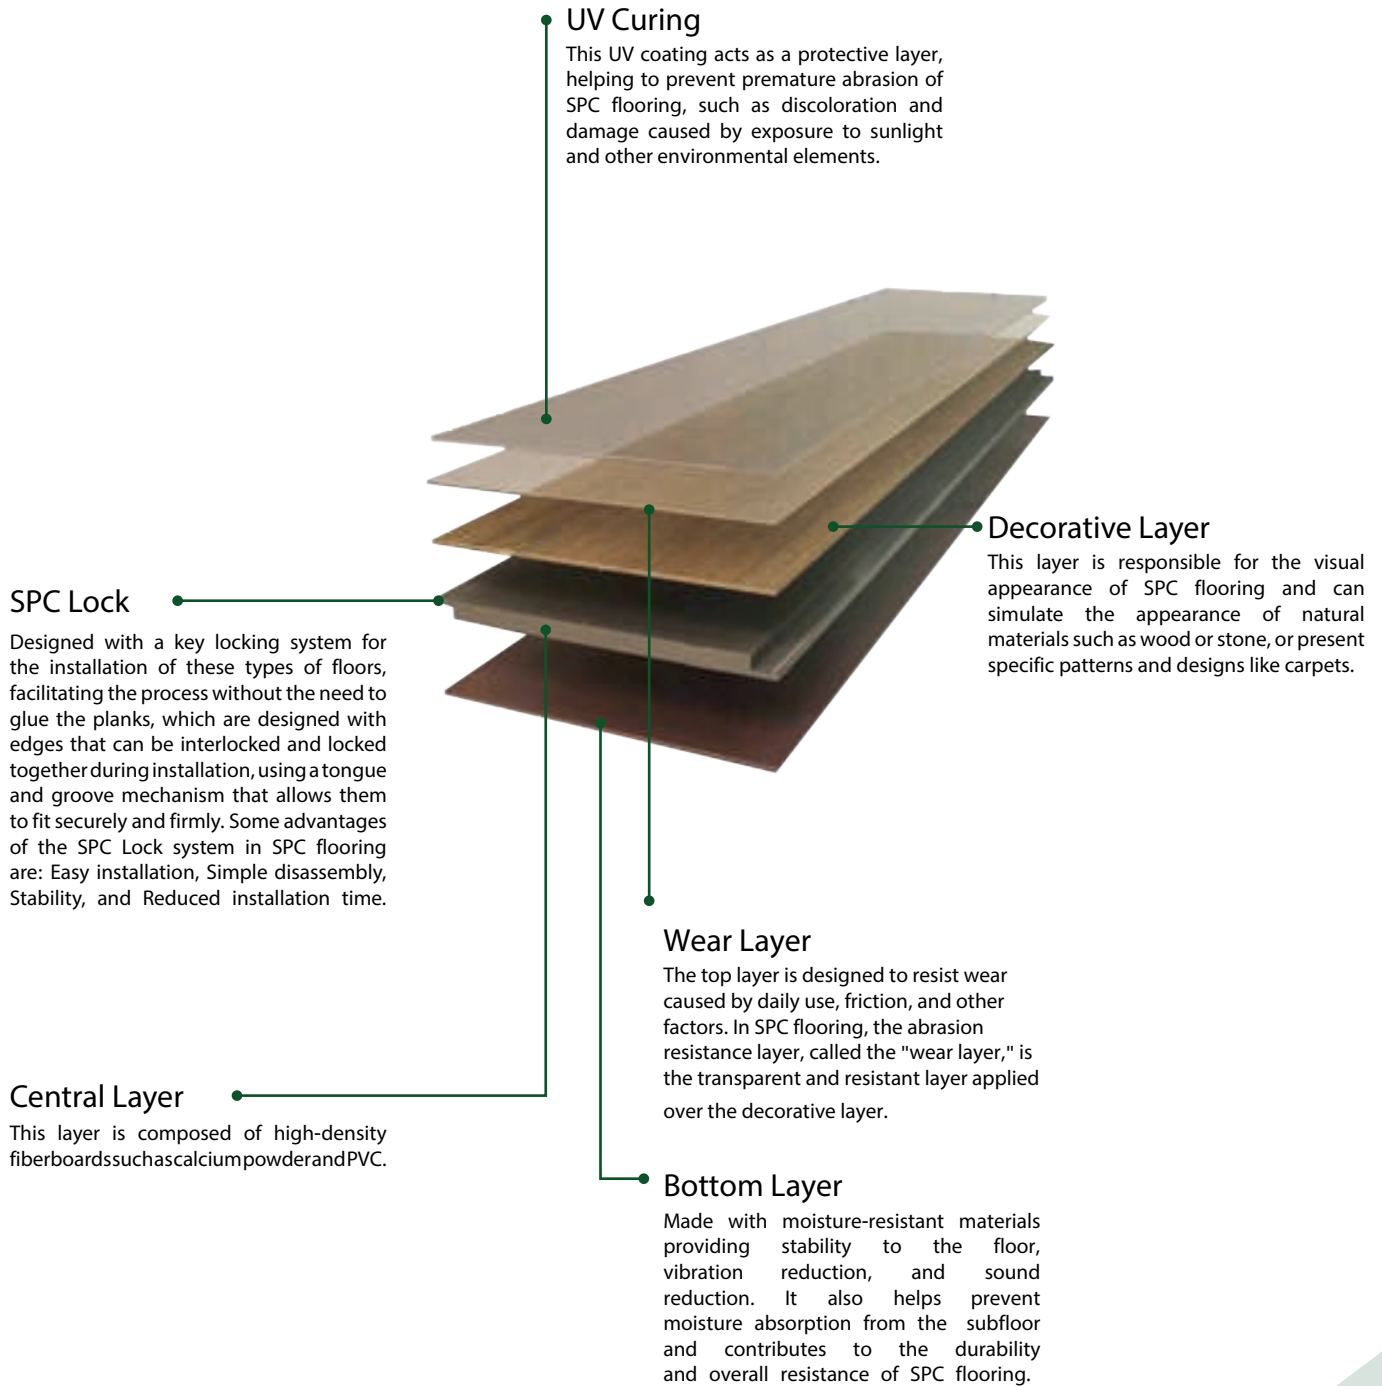

It is designed to repel water and remain waterproof even when exposed to damp or wet conditions.

Free of formaldehyde and non-toxic. Its manufacturing is sustainable, using renewable resources and minimizing the depletion of non-renewable resources.

# HERRINGBONE

"Herringbone stylish" refers to a style or design that incorporates the herringbone pattern. This pattern is characterized by having rectangular pieces or parallelograms arranged at a 45-degree angle to each other, creating a zigzag design similar to a herringbone spine. This style highlights the elegance, fashion, and aesthetic appeal of a SPC Floor that incorporates this pattern or design, thus becoming a popular and classic form, adding a distinctive and sophisticated touch.

## SPC Floors

# MARMOL CITY

Marble is a natural stone known for its beauty and elegance, thanks to which SPC flooring can be manufactured in different thicknesses, thus adapting to the different needs or requirements of the environment. Some advantages of this type of floor are that it mimics the finish of marble, as well as its beauty and elegance without the high cost that real marble represents. Its versatility allows for different designs, colors, and finishes.

# SPC Floors

## PERSIAN

The SPC flooring with a carpet pattern naturally simulates the texture of the carpet. At the same time, being waterproof makes it easy to clean and turns it into a durable solution. Its installation is quick, convenient, and easy to maintain.

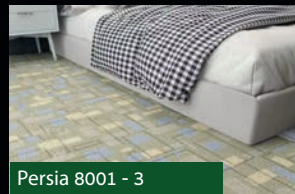

Carpets evolve through SPC flooring, and some of its advantages include easy cleaning and durability under a timeless finish concept.
